

MENTEES

Testimonials from some mentees:

Jenny VU (Master of Accounting)

Dr. Geoffrey Chow is a kind and caring person. As an international student with no family members in Australia, I turned to Dr. Chow for advice and help. He has been a mentor to me with my studies and my future career plan. He has even helped me in my examination preparation recently with one of my last few subjects for my Masters course. Eventually, I obtained a Distinction for that subject. I have now completed my Masters course successfully. My visiting parents were incredibly happy and thanked Dr. Chow with a lunch at home during their month-long stay in Melbourne, Australia.

Jonathan CHAN (Bachelor of Business and IS)

I completed my studies at the Lilydale Campus of Swinburne University where Dr. Geoffrey Chow was teaching. Dr. Chow taught me several marketing subjects. I was very impressed with his approach to teaching and his teaching methods. Dr. Chow introduced innovations to his teaching – he was the first to use tablets and mobile devices in the classroom. He has an in-depth knowledge of mobile computing and wearable technologies which I appreciated very much as I am also a keen user and supporter of the use of mobile devices.

Joyce LIM (Bachelor of Business, Singapore)

I completed my studies at Kaplan Higher Education in Singapore, majoring in marketing that was taught by Dr. Geoffrey Chow. I was a computer engineer before that. I have kept in touch with Dr. Chow since my graduation. I have been very impressed by Dr. Chow's teaching, and I was also inspired by his positive and caring attitude. Now, I treat Dr.

Chow as a friend and a mentor. When he visits Singapore, I make time to meet with him, have a cup of coffee, and a chat.

Jackson WONG (Bachelor of Business, Singapore)

Six years ago, I completed my studies at Kaplan Higher Education in Singapore. Dr. Geoffrey Chow used to travel to Singapore twice a year to teach us. I was fortunate enough to be taught by Dr. Chow whose teaching style and approach have spurred me on to complete my studies successfully. After completing my studies, I found a job, and begun to build my career. I kept in touch with Dr. Chow. When he visited Singapore occasionally, we usually went out to have a meal. He has been an inspiration to me in my studies and in my career-building.
